

## **Air Conditioning Troubleshooting & Diagnostics**

This new one day class is for the *experienced* service technician who would like to polish his or her skills and greatly increase their troubleshooting and diagnostic abilities.

Dozens of specific problems will be reviewed with emphasis on specific troubleshooting tests to run and understanding what the tests are telling you. This class is non specific to any particular model or brand.

**Topics Covered** Review of the cycle with an emphasis on when to use various tests.

Power to the contactor but unit won't run. Both single and three phase.

The unit is cycling off on various limits, what to look for and how to find the problem.

The unit runs but has faulty pressures. What tests to run, what they mean, how to find the real problem.

Dozens of different scenarios will be discussed.

**Who should attend:** **EXPERIENCED SERVICE TECHNICIANS.**

This is not for beginners.

**Duration** One Day 8AM to 4PM

**Cost** \$180.00 Per person.

**Included** Morning coffee and donuts, lunch, afternoon break, manuals and Diagnostic Calculator.
